Hot Topic!

Year 4 Science week

Last week we learned all about solids, liquids and gasses.

We learned that gasses can change into liquids, and that solids can change into liquids. This has shown us that solids liquids and gasses can change their state.

We're proud to show our values...

This half term's value is:

RESPONSIBILITY

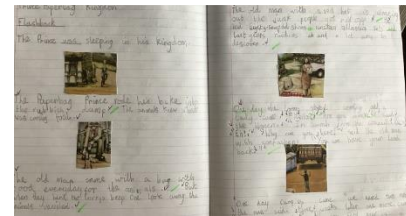

Liliana in Oak class has been showing responsibility by supporting her new learning partner during learning time.

Safia in Maple class

For applying the speech rules when writing about the key parts in the text; The Paperbag Prince.

What a star! You even included question marks! 😊

We need your help!

Homework

Some of us struggle with our homework, so could you spend some time helping us complete the task we have been set.
